

StableUnit

Stablecoin which earns yield while it's in your wallet

PROBLEM & BIG MARKET

Most of the \$130B value is in fiat-collateralized stablecoins like Tether and USDC. Decentralized stablecoins like DAI and sUSD make up only a small portion of the total supply, meaning the vast majority of stablecoins are centralized and can freeze funds at any moment.

Stablecoins are faster, programmable, and yield higher interest compared to the classical finance instruments. These advantages may result in substantial off-chain capital adoption on the blockchain. Right now, the market share of stablecoins is less than 6%, and is expected to grow significantly.

SOLUTION

**Borrow stablecoins (SUD) against assets you HODL.
Get Leverage. Earn yield while it's in your wallet.**

StableUnit protocol is a censorship-resistant, CDP-based stablecoin secured by capital-efficient DeFi assets like ETH and LP tokens.

HOW IS SUD STABILIZED?

SUD uses Multi-layer stabilization mechanism which is a the stack of different stabilization methods used one by one if price fluctuation has exceeded.

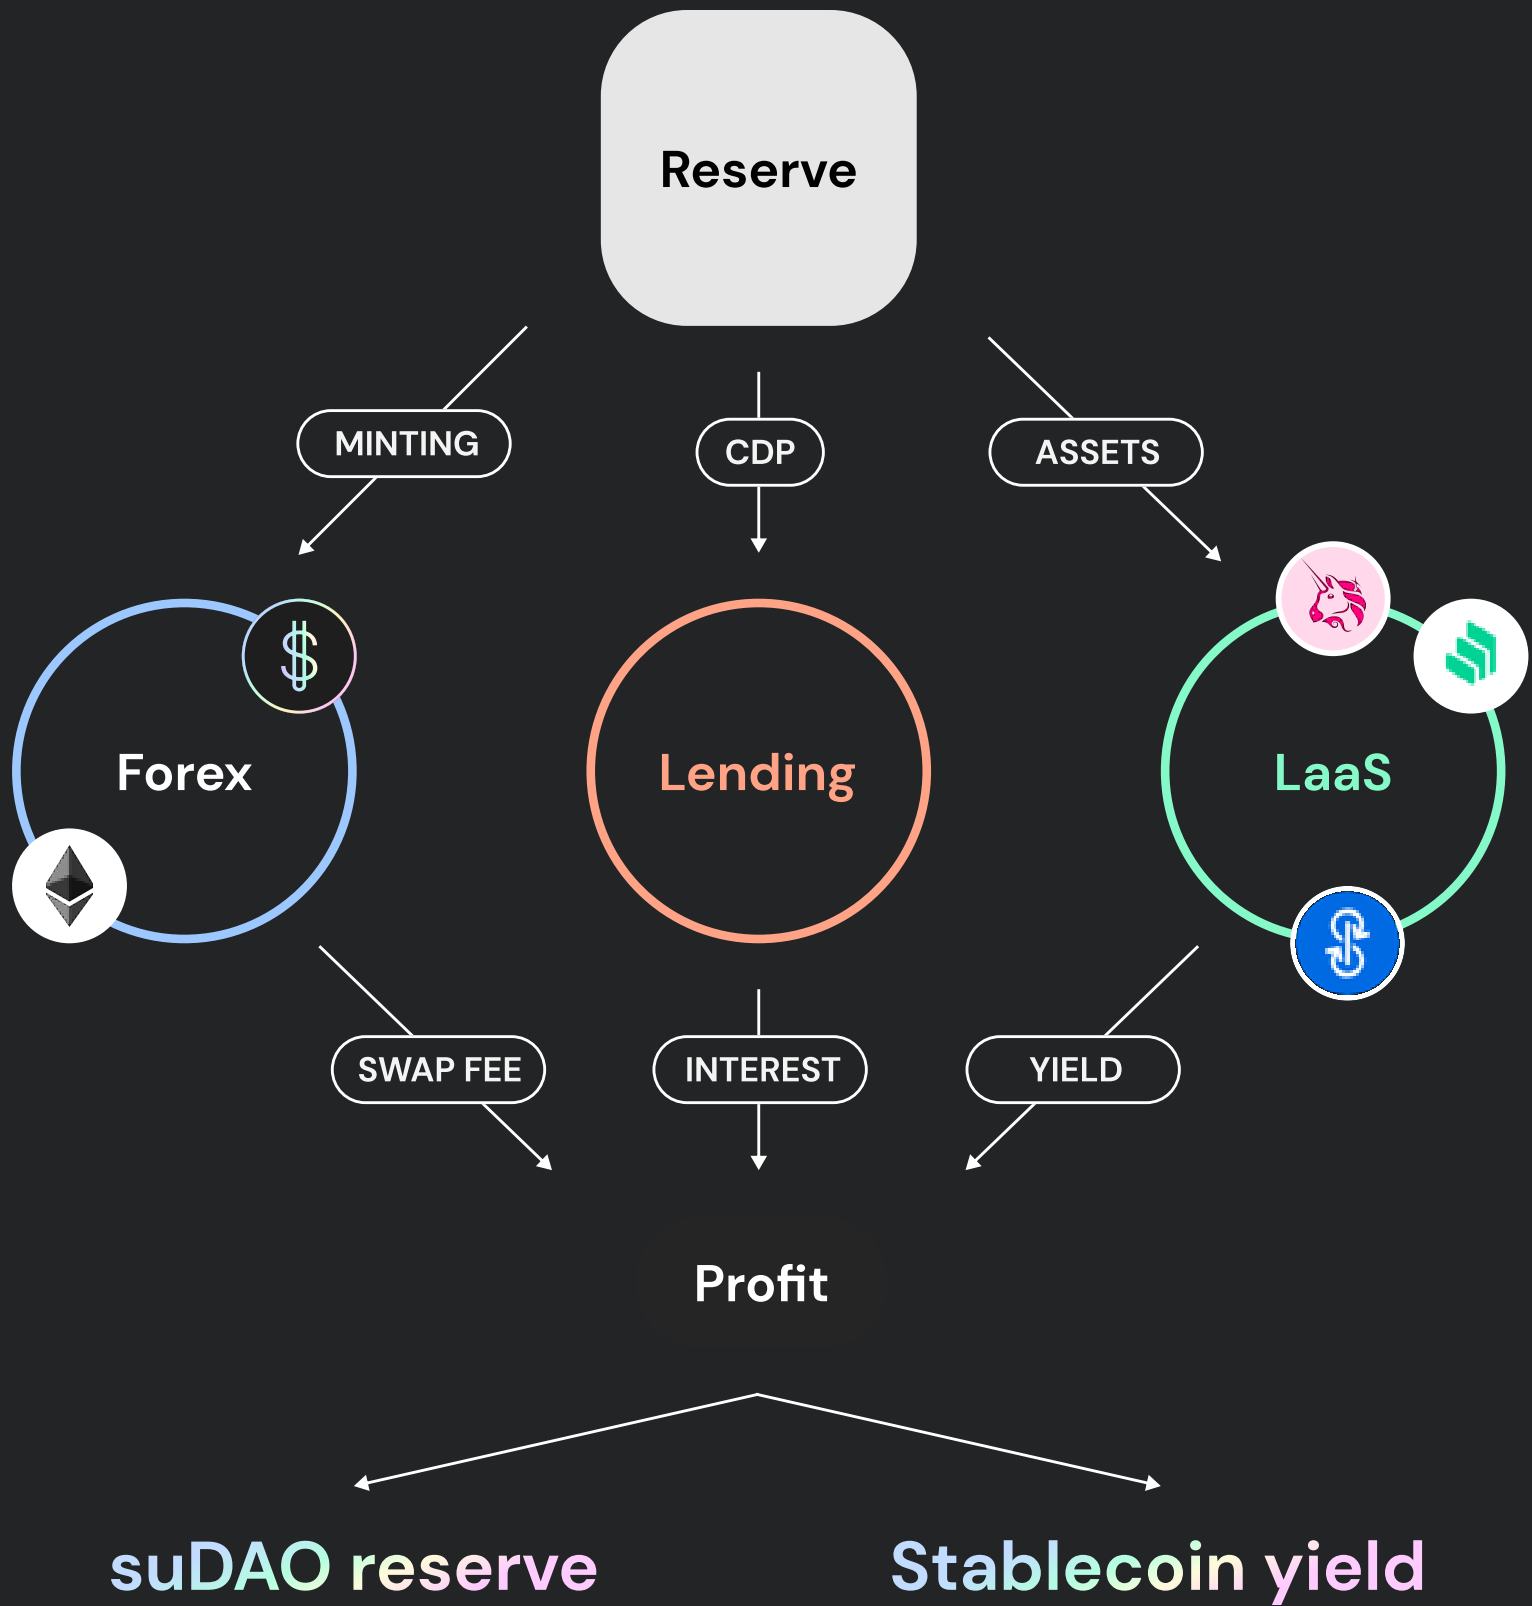

SCALABILITY & SAFETY

SUD unites the robustness of over-collateralized stablecoins, like DAI, with the scalability of algo-stablecoins without compromising decentralization and safety.

CAPITAL EFFICIENCY

StableUnit ecosystem generates yield from liquidity as a service, forex and lending services. Unlike other stables, which leave assets in reserve idle, StableUnit puts those assets at work. Yields are automatically accrued in your wallet and compound daily. No staking, no lock-ups.

USE CASES

DEPOSIT

Bring the collateral you want, accrue interest automatically and get out when you want to.

BORROW

Borrow against your existing wealth and buy more assets, leverage your trades, or earn additional interest on borrowed stablecoins.

STABLECOINS YIELD

Receive passive income in SUD for holding SUD in your wallet. No staking, farming, deposits, lockups required.

TOKENOMICS

suDAO token is a governance and utility token of the StableUnit DAO ecosystem.
suDAO token is minted by a bitcoin-like formula and is hardcapped at 21,000,000 tokens.

ROADMAP

TEAM SLIDE

BOARDS:

FOUNDER

linch, Amazon, FB, math degree, prizewinner ethBoston, ethDenver, ethNY, wrote ethereum contracts for more than a billion dollars

ARCHITECT

5 years senior solidity, L2-dev, Swiss Bank, teach blockchain at Colombia university

PRODUCT, UX

Intel, Oracle, Uber

FRONT-END

Alfa-Bank, SberBank, graduate of blockchain department at MIPT

ADVISORS:

PR/MARKETING

Economist Intelligence Unit (EIU), CNBC, Newsweek, Blockchain Commission For Sustainable Development (with Support of The Office of Partnerships UN GA)

ECONOMY

Google DeepMind, math degree

SIMULATION

bitTensor, Google, DARPA
