

# StableUnit

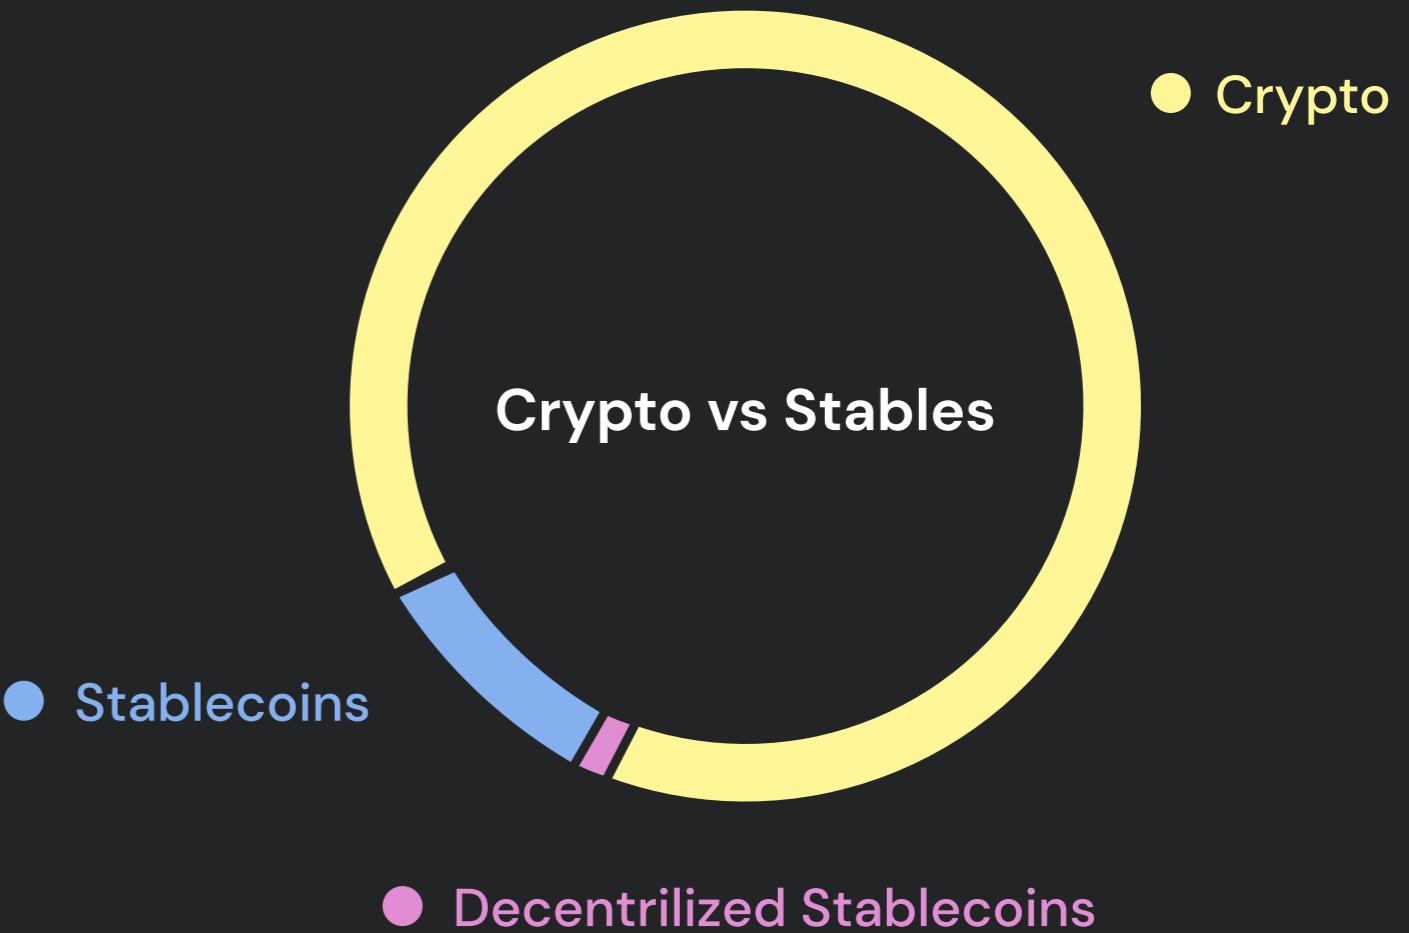

Stablecoin which earns yield within your wallet

# PROBLEM & BIG MARKET

Most of the \$130B value is in fiat-collateralized stablecoins like Tether and USDC. Decentralized stablecoins like DAI and sUSD make up only a small portion of the total supply, meaning the vast majority of stablecoins are centralized and can freeze funds at any moment.

Stablecoins are faster, programmable, and yield higher interest compared to the classical finance instruments. These advantages may result in substantial off-chain capital adoption on the blockchain. Right now, the market share of stablecoins is less than 6%, and is expected to grow significantly.
