

StableUnit

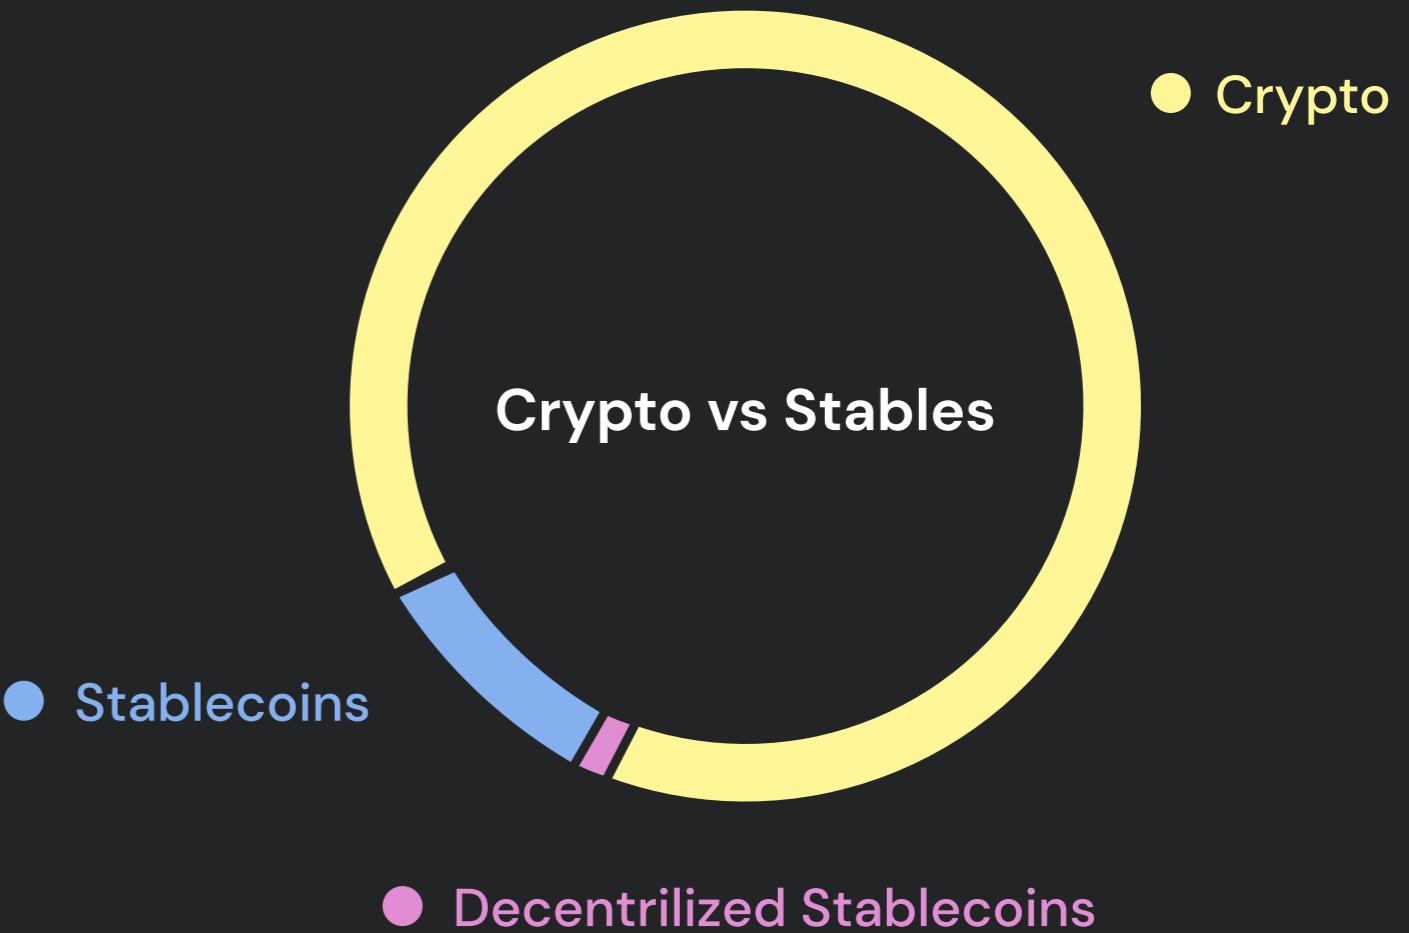

Stablecoin which earns yield within your wallet

PROBLEM & BIG MARKET

Most of the \$130B value is in fiat-collateralized stablecoins like Tether and USDC. Decentralized stablecoins like DAI and sUSD make up only a small portion of the total supply, meaning the vast majority of stablecoins are centralized and can freeze funds at any moment.

Stablecoins are faster, programmable, and yield higher interest compared to the classical finance instruments. These advantages may result in substantial off-chain capital adoption on the blockchain. Right now, the market share of stablecoins is less than 6%, and is expected to grow significantly.

SOLUTION

Borrow StableUnit Stablecoins (SUD) against assets you HODL, Get Leverage, Accumulate Interests within your wallet

StableUnit protocol is a censorship-resistant, CDP-based stablecoin secured by capital-efficient DeFi assets like ETH and even LP tokens

HOW IS SUD STABILIZED?

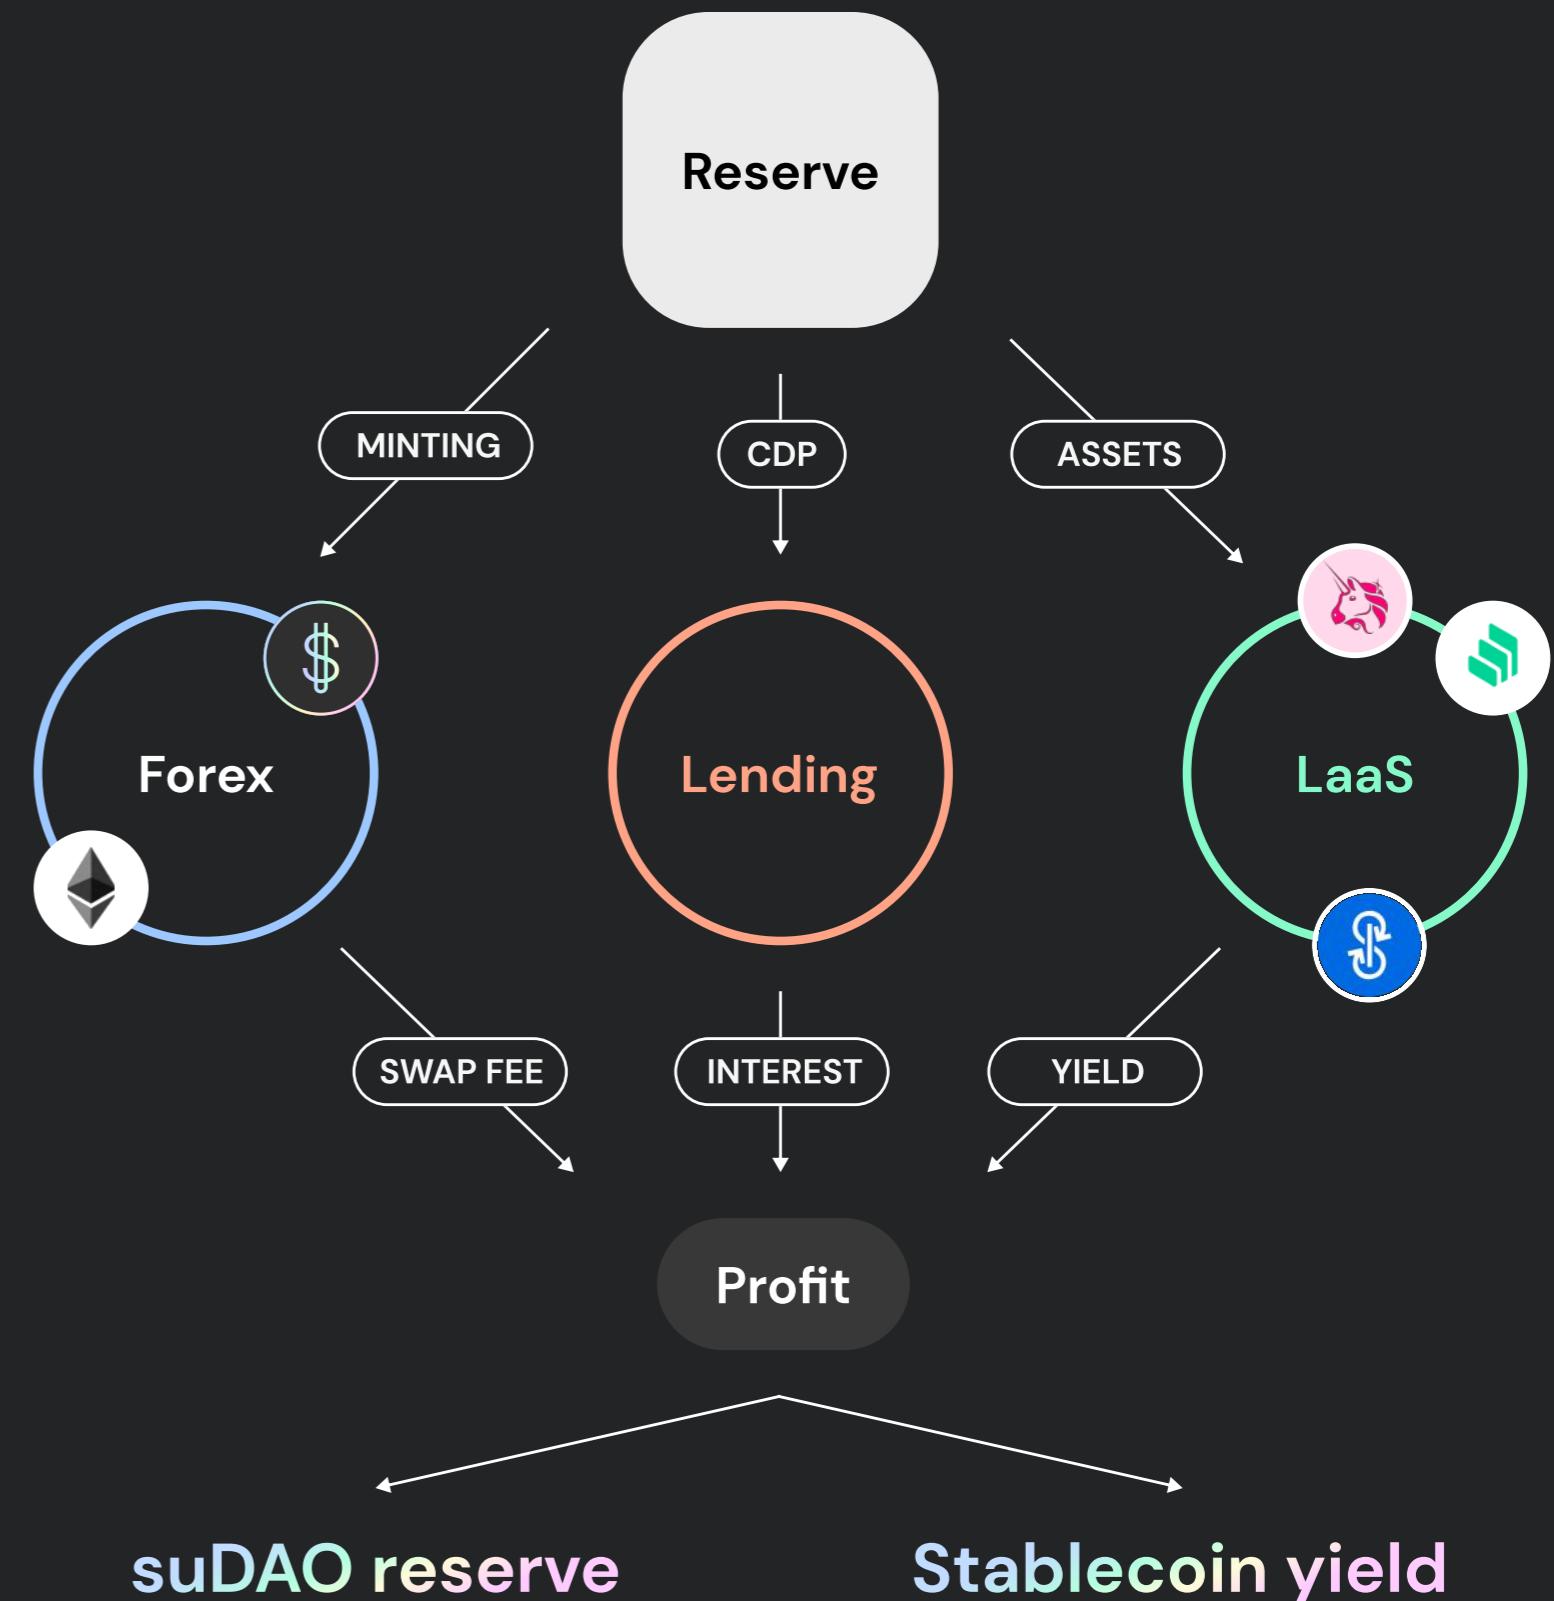

SUD uses Multi-layer stabilization mechanism which is a stack of different stabilization methods used one by one. Next mechanism is used if price fluctuation has exceeded the stabilization capacity of the previous mechanism.

SCALABILITY

SUD unites the robustness of over-collateralized stablecoins, like DAI, with the scalability of algo-stablecoins without compromising decentralization and security.

CAPITAL EFFICIENCY

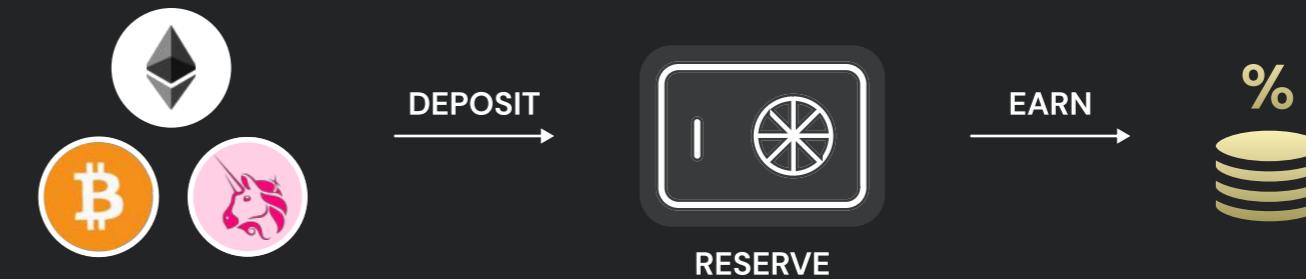

StableUnit ecosystem generates yield from the following sources: forex, lending, liquidity as a service (LaaS). Unlike other stables which leave the assets in reserves idle, StableUnit protocol puts those assets at work. Yields are automatically converted to SUD and accrue in your wallet. Your SUD balance compounds multiple times per day. No staking or lock-ups are required.

USE CASES

DEPOSIT

Bring the collateral you want, accrue interest automatically and get out when you want to.

BORROW

Borrow against your existing wealth and buy more assets, leverage your trades, or earn additional interest on borrowed stablecoins.

STABLECOINS YIELD

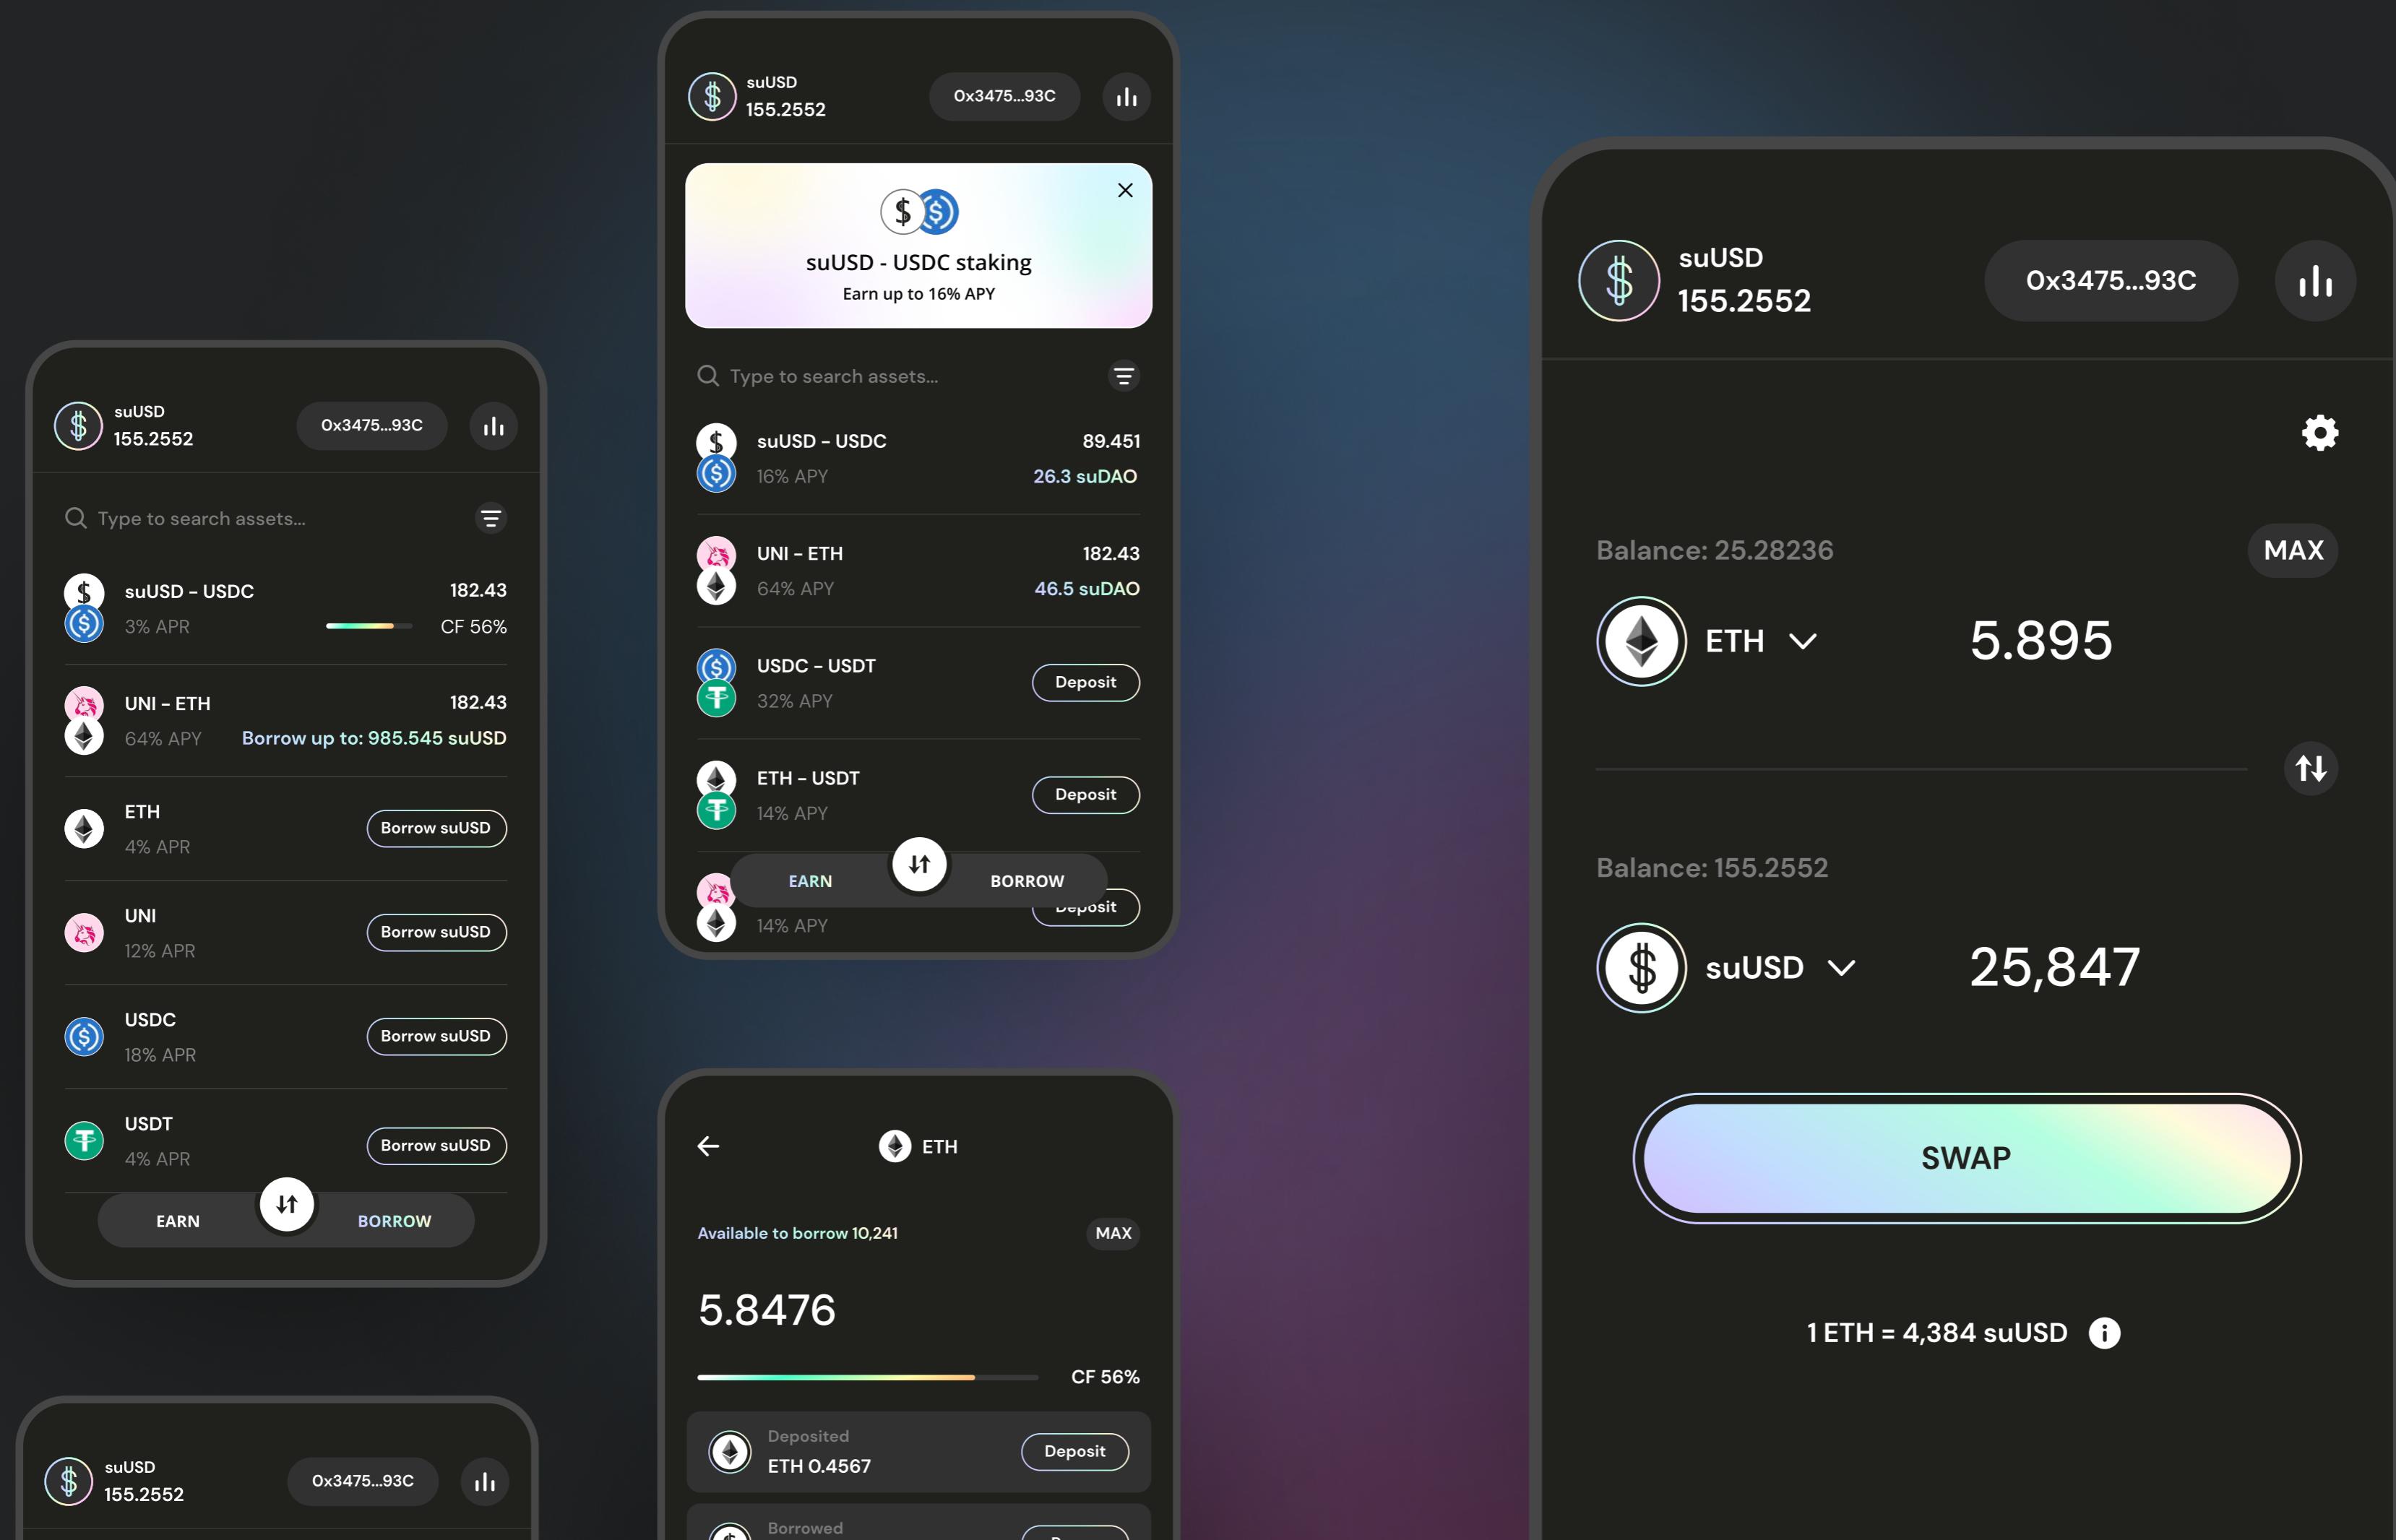

Receive passive income in SUD for holding SUD in your wallet. No staking, farming, deposits, lockups required.
