

StableUnit

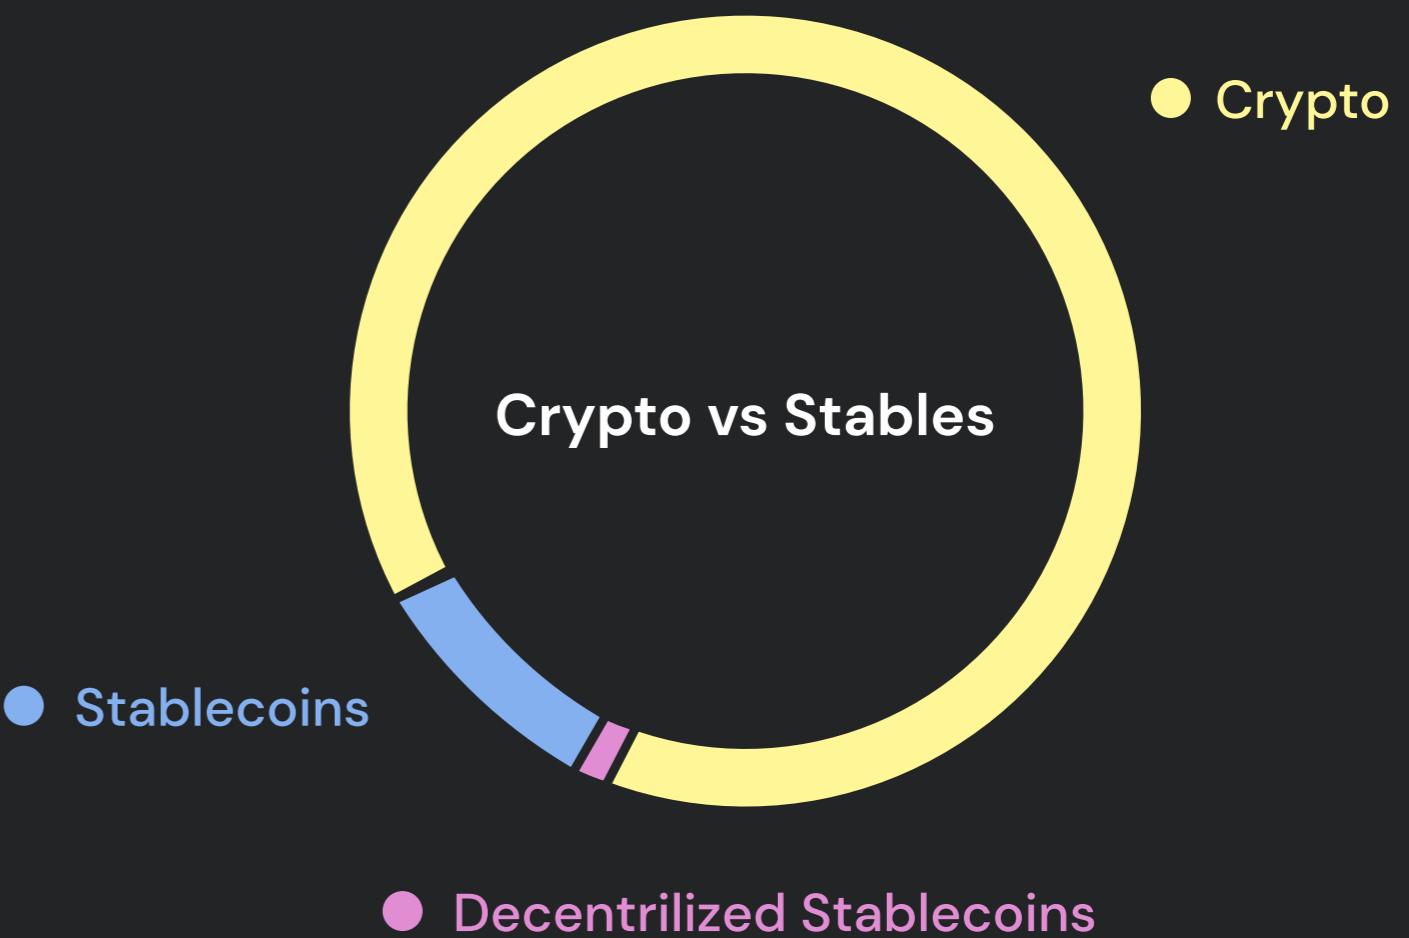

Stablecoin which yields within your wallet

PROBLEM & BIG MARKET

Most of the \$130B value is in fiat-collateralized stablecoins like Tether and USDC. Decentralized stablecoins like DAI and sUSD make up only a small portion of the total supply, meaning the vast majority of stablecoins are centralized and can freeze funds at any moment.

Stablecoins are faster, programmable, and yield higher interest compared to the classical finance instruments. These advantages may result in substantial off-chain capital adoption on the blockchain. Right now, the market share of stablecoins is less than 6%, and is expected to grow significantly.

SOLUTION

StableUnit protocol is a censorship-resistant CDP-based stablecoin with multi-layered stabilization model secured by capital-efficient DeFi assets.

This approach unites the robustness of over-collateralized stablecoins (e.g.DAI) with the scalability of algo-stablecoins without compromising decentralization. Moreover, it uses collateral to generate profit and automatically distributes it to every wallet holding suDAO.

COMPETITION

	StableUnit	Tether	USDC	DAI	FEI
Can't be frozen	+	-	-	+	+
Scalable	+	+	+	-	-
Yields profit	+	-	-	-	-
Over-collateralized	+	-	+	+	+
Mcap	\$21 M	\$61 B	\$27 B	\$5.3 B	\$344 M

PRODUCT INTERFACE

BUSINESS MODEL

The business model generates income from the following sources:

1. SWAP

earns exchange fees

2. Lending

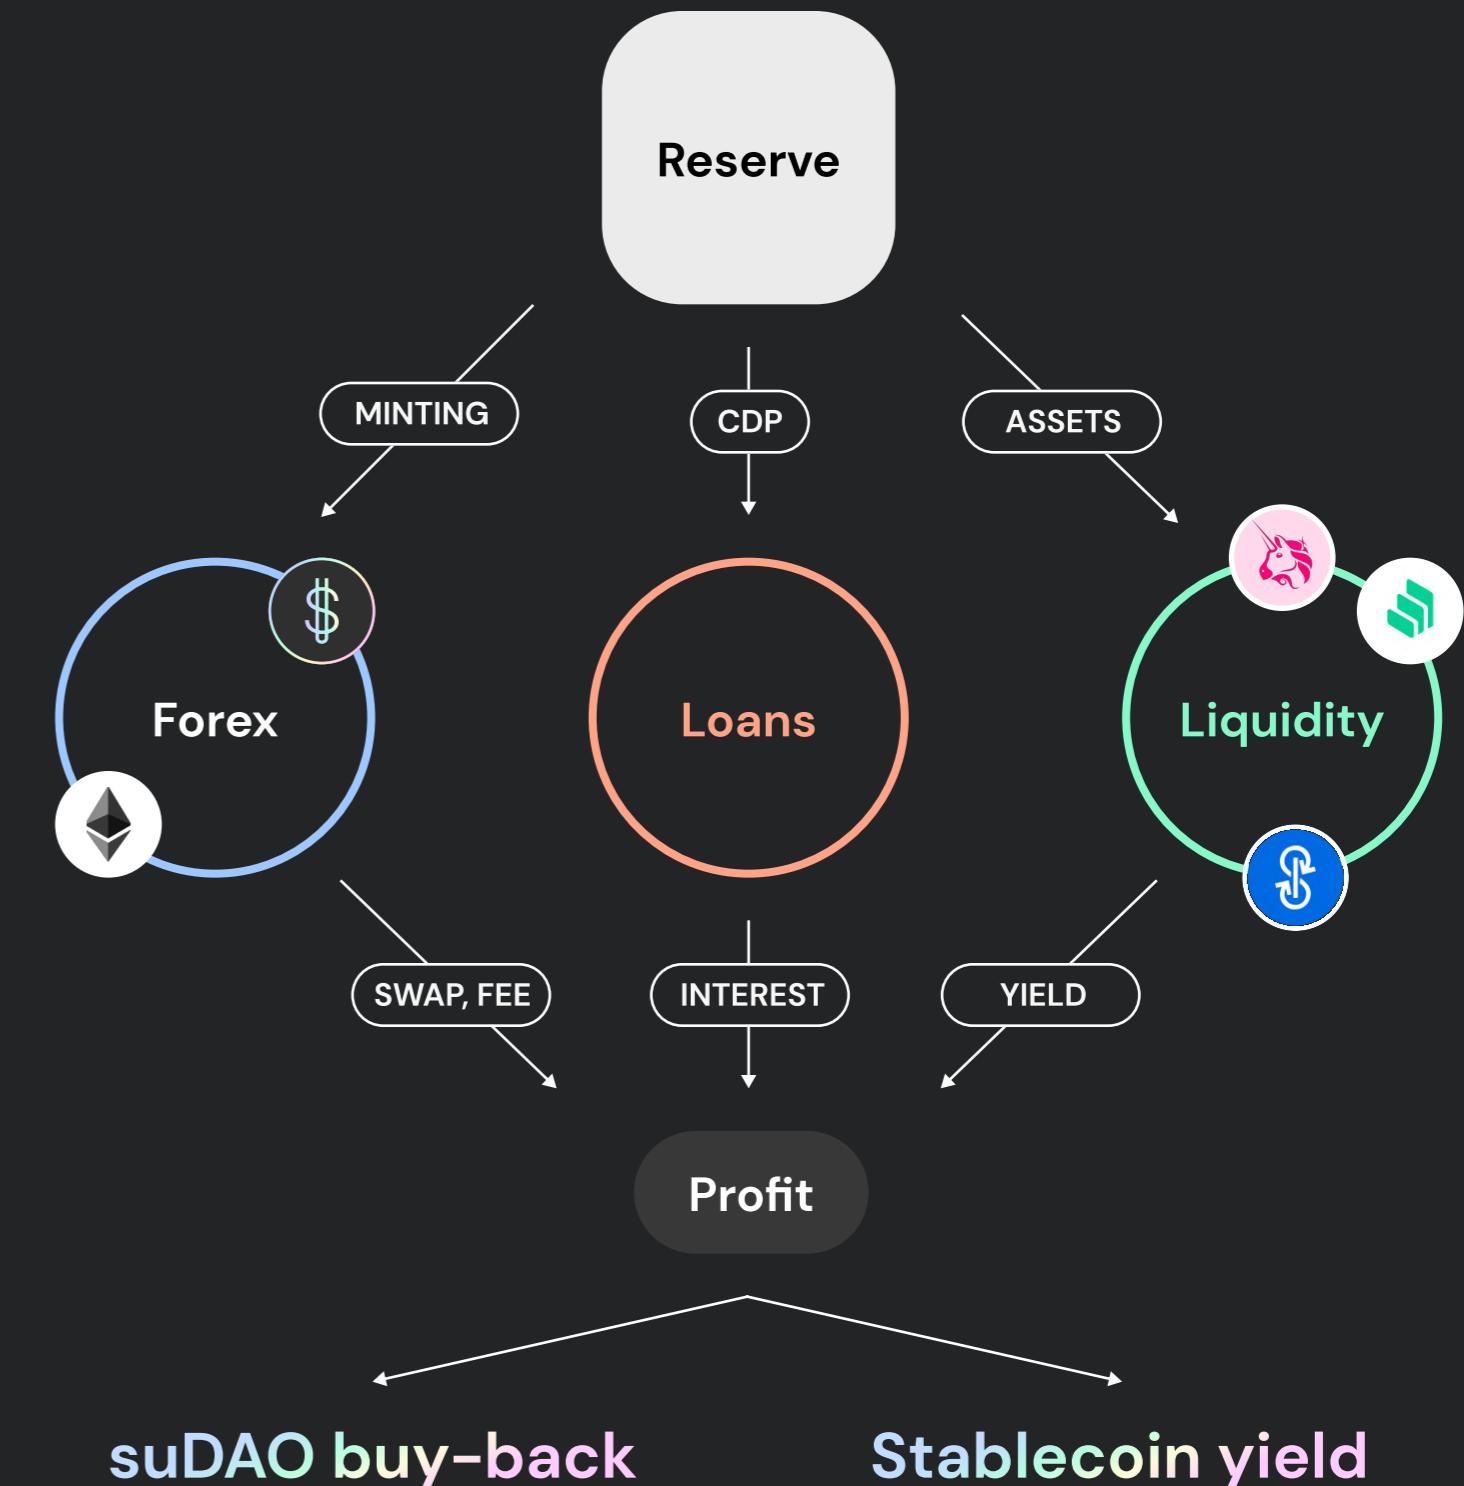

earns lending interest

3. Capital

staking collateral in yearn, curve, compound, etc

Profit distribution

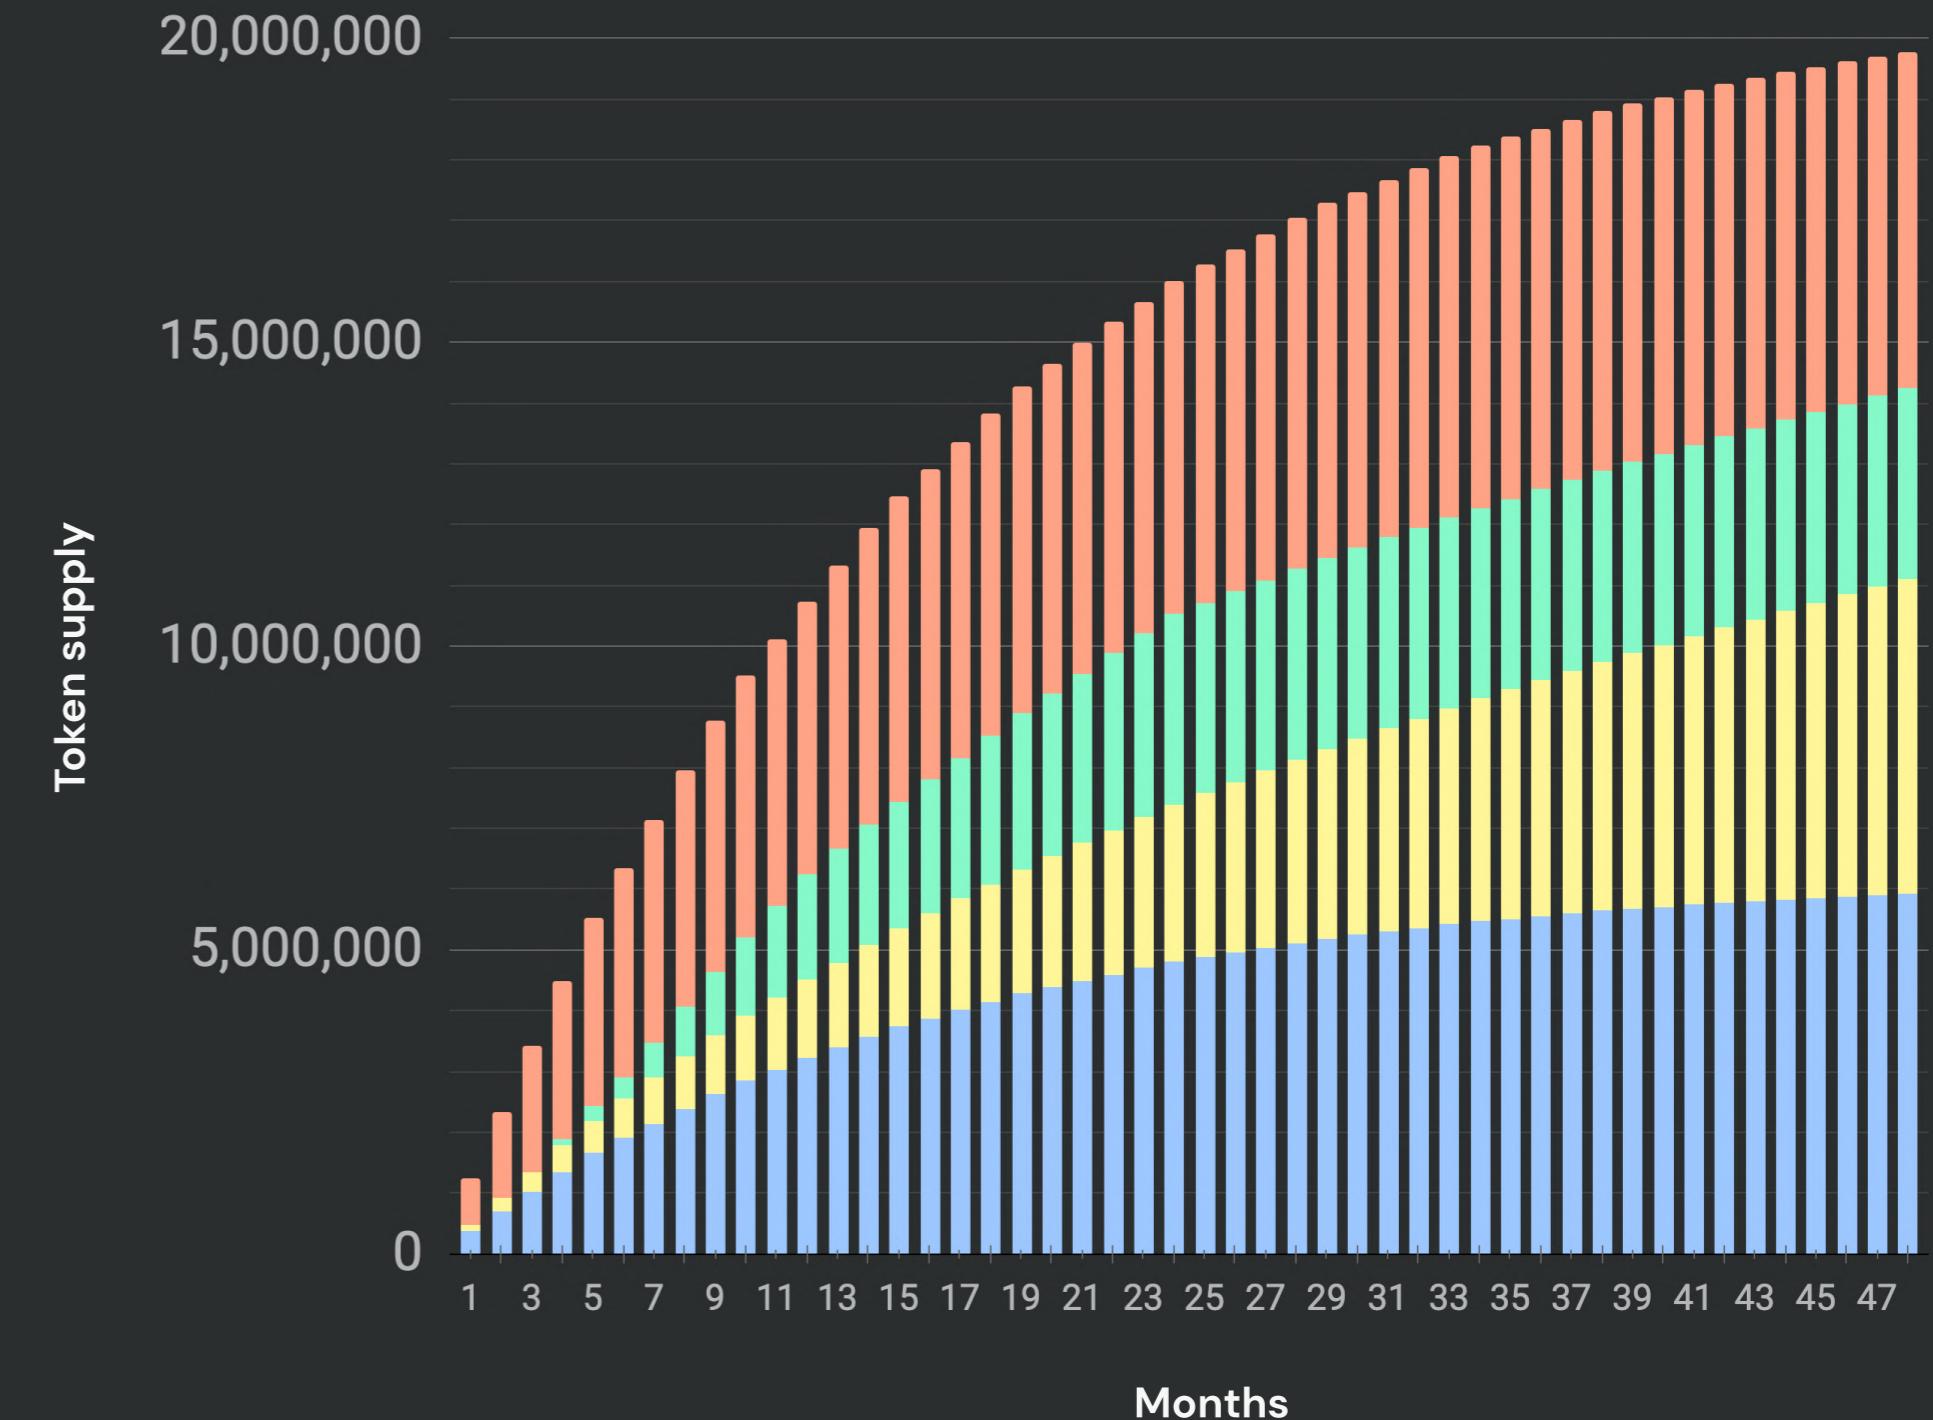

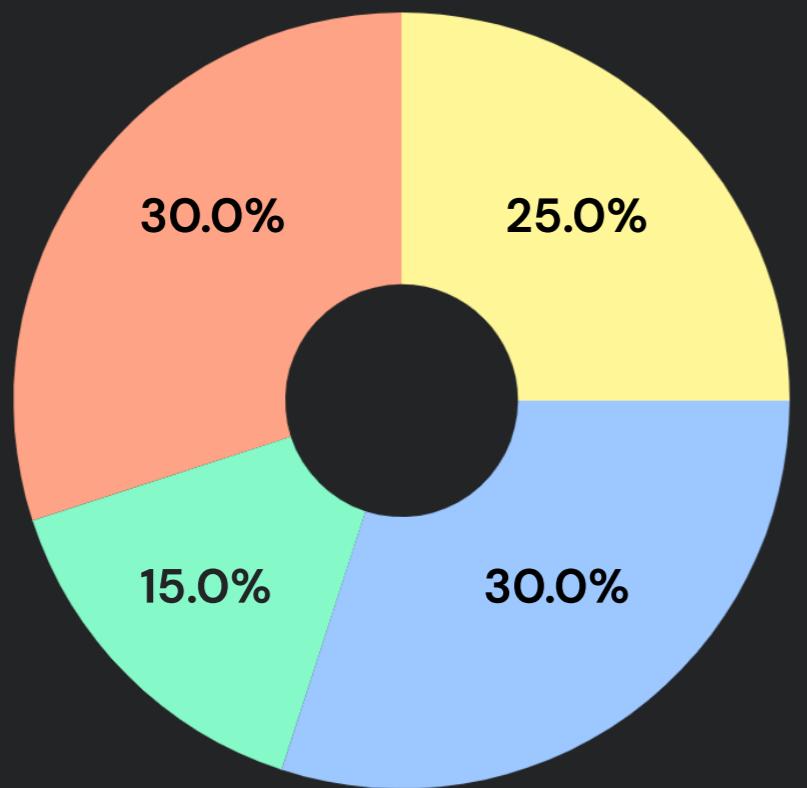

- buys back suDAO token form circulation to generate additional demand
- distributes directly to wallets holding suUSD

TOKENOMICS

suDAO is minted by a bitcoin-like formula and is hardcapped at 21,000,000 tokens.

All newly minted tokens go to DAO reserve and split as shown on the chart below:

● PRESALE DISTRIBUTION

● DEVELOPMENT

● DAO CONTROLLED RESERVE

● ECOSYSTEM GROWTH, FARMING

ROADMAP

**Q3
2021**

- RnD of stability
- WP
- testnet UI PoC
- UX/UI
- Testnet over-collateralized stablecoin

**Q4
2021**

PoC – all basic functionality on testnet, dapp without final design

**Q1
2022**

ETH mainnet. Contracts finalized. Limits removed

Scaling to side-chains and other chains: Harmony, Avalanche, Arbitrum, Optimism and others

**Q3
2022**

Plug&Play wallet for non-blockchain usage

**Q2
2022**

- API and tools for developers
- Payment gateway for online payments, e-commerce stores

TEAM SLIDE

BOARDS:

FOUNDER

1inch, Amazon, FB, math degree, prizewinner ethBoston, ethDenver, ethNY, wrote ethereum contracts for more than a billion dollars

ARCHITECT

5 years senior solidity, L2-dev, Swiss Bank, teach blockchain at Colombia university

PRODUCT, UX

Intel, Oracle, Uber

FRONT-END

Alfa-Bank, SberBank, graduate of blockchain department at MIPT

ADVISORS:

PR/MARKETING

Muckr AI Founding Board Member: Blockchain Commission For Sustainable Development/Blockchain For Impact Summit with Support of Office of Partnerships UN GA. Award-winning journalist and civic technologist focussed on scalable solutions for SDG8.

ECONOMY

Google DeepMind, math degree

SIMULATION

bitTensor, Google, DARPA
